

FOR THE YEAR 2030

# SUSTAINABLE INNOVATIONS : A COMMITMENT

## Report Overview

Nutrialgo blends cutting-edge science with eco-consciousness, emerging as a leader in sustainable spirulina production. Our farms minimize water and carbon footprint through advanced aquaculture and natural sunlight. We power facilities with renewable energy and optimize supply chains. Byproducts become organic fertilizers and biogas, embracing a zero-waste philosophy.

More than just spirulina producers, we're community champions. We create jobs, support local projects, empower farmers, and educate on nutrition and sustainable agriculture. Employee well-being thrives in our culture of health, safety, and growth.

Sustainable practices fuel our economic growth as we invest in green technology. Our ambitious goals include carbon neutrality by 2030 and expanding community programs. Nutrialgo: a beacon of sustainable change for a greener, healthier future.

# Company Profile

Nutrialgo: Where sustainability meets superfood. We're not just growing spirulina, we're redefining sustainable agriculture. Our eco-friendly practices minimize our footprint, from water conservation to renewable energy. But Nutrialgo's impact goes beyond the farm. We empower communities, educate on nutrition, and strive for a healthier planet. Join us on this journey towards a greener future, one spirulina scoop at a time.

## Who we are

Fueling a healthier future, one bite at a time, Nutrialgo isn't just a company, it's a revolution. We blend cutting-edge science with sustainable practices to redefine nutrition. Forget mere producers, we're global champions for organic micronutrients, empowering well-being and setting a new health standard.

Driven by an ambitious vision, we're leading the charge toward a healthier world through delicious, nutrient-rich products and innovative partnerships. Sustainability guides every step, ensuring alignment with rigorous standards like NOP and APEDA, and minimal environmental impact. Join us, nourish planet and people, and redefine health, together.

## What we do

We're Nutrialgo, your trusted partner in all things spirulina. We offer diverse, custom-tailored services like contract manufacturing, private labeling, and expert consultation. Whether you're a health enthusiast, food producer, or supplement manufacturer, we have the high-quality, eco-friendly solutions you need. Experience the power of nature's superfood with Nutrialgo!

## Our Services

Organic Cultivation	Contract Manufacturing	Private Labeling
 	 	 
Quality Assurance	Consultation	R&D

## Management Approach

Nutralgo's leadership orchestrates a symphony of sustainability. We minimize our footprint through eco-friendly practices, empower communities through job creation and knowledge sharing, and prioritize green technology for long-term economic stability. Our R&D team orchestrates the next movement, constantly innovating for a greener future. Carbon neutrality by 2030 is just the opening note. Join us in this harmonious movement for a healthier planet and a sustainable future.

## Performance

Nutralgo bloomed in 2020, sun-soaked farms minimizing water while renewables powered production. Waste became life through biogas and fertilizer, communities thrived with jobs and knowledge. Education blossomed, children nourished, employees empowered. Sustainable growth took root, local suppliers nurtured, profitability bloomed. Carbon neutrality awaits in 2030, educational roots reaching deeper. Nutrialgo, not just spirulina, but a future cultivated with every step.

## Environmental Sustainability

- Eco-friendly Cultivation
- Carbon Footprint Reduction
- Waste Management

### **Eco-friendly Cultivation:**

- Our spirulina farms utilize advanced aquaculture techniques that minimize water usage, conserving this precious resource.
- By harnessing natural sunlight, we significantly reduce our reliance on artificial energy sources, lowering our carbon footprint.

### **Carbon Footprint Reduction:**

- Investments in renewable energy sources, like solar panels, are strategically planned to power our facilities and further reduce our environmental impact.
- We've optimized our supply chain to reduce transport emissions, using local suppliers whenever possible.

### **Waste Management:**

- Spirulina processing generates valuable resources, not waste. Currently, byproducts become nutrient-rich organic fertilizers, and future innovations will unlock their potential for biogas production, propelling us towards a closed-loop, zero-waste future.

## Social Responsibility

- Community Engagement
- Education Initiatives
- Employee Well-being

### Community Engagement:

- Nutrialgo's presence has revitalized local communities by providing stable employment and supporting local sustainability projects.
- We collaborate with local farmers, sharing knowledge and resources to uplift their practices.

### Education Initiatives:

- Our educational programs focus on nutrition and sustainable farming practices, helping communities understand the value of spirulina and sustainable agriculture.
- We've partnered with local schools to integrate these programs into their curriculum.

### Employee Well-being:

- Nutrialgo fosters a workplace where health, safety, and professional growth are paramount.
- Regular training, health initiatives, and an inclusive work culture ensure our team feels valued and empowered.

## Economic Sustainability

- Sustainable Business Growth
- Supporting Local Economies

### Sustainable Business Growth:

- Our business model is built on the foundation of sustainability, ensuring long-term economic stability through investments in green technology and practices.
- We prioritize sustainable spirulina production without compromising on quality or profitability.

### Supporting Local Economies:

- Our operations bolster local economies. We prioritize local suppliers, thereby supporting regional businesses and reducing logistics-related emissions.

## Sustainability Initiatives

Cultivating spirulina, empowering communities. We pioneer sustainable R&D, reducing our footprint & aiming for carbon neutrality by 2030. Join us in building a healthier, greener future.

## R&D in Sustainability

- Nutrialgo is dedicated to pioneering research in sustainable spirulina cultivation.
- We continuously explore innovative technologies to enhance efficiency and reduce our environmental impact.

## Future Targets

- Our roadmap includes achieving carbon neutrality by 2030 setting a new standard in the industry.
- We aim to expand our community outreach, fostering more comprehensive educational and nutritional programs.

# Conclusion

Nutrialgo Private Limited is more than just a spirulina producer; we are a harbinger of sustainable change in the industry. Our commitment to the planet, our people, and our practices drives us to continually set higher standards in sustainability, ensuring a greener, healthier future for generations to come.
